

Hirtenberger Defence Europe GmbH is a globally active developer, producer, and supplier of state-of-the-art mortar systems. To strengthen our team in Hirtenberg, Lower Austria, we are looking for an

IT Infrastructure and Security Specialist (m/f/d)

Your New Challenge

Do you have a strong interest in IT and security?

As an IT Infrastructure and Security Specialist, you will be responsible for ensuring the reliable operation, security, and continuous development of IT infrastructure across multiple countries. Your role includes expanding the IT infrastructure, managing security, and coordinating various projects.

This exciting position includes the following tasks:

- Maintenance and support of the entire IT infrastructure (servers, networks, workstations, cloud)
- Administration of user accounts, access rights, and Active Directory
- Ensuring stable and reliable IT operations
- Planning and coordination of hardware (e.g., servers, devices) throughout their lifecycle
- Implementation and monitoring of IT security measures
- Identification and remediation of security vulnerabilities, including updates and patching
- Collaboration with and coordination of external IT service providers
- Support and operation of applications in a Citrix environment
- Creation and maintenance of IT documentation, policies, and processes
- Supporting users with complex IT issues and collaborating with international teams

Your Profile

- Degree in IT or a comparable qualification
- Several years of professional experience in cybersecurity, IT operations, or system administration
- Experience with IT infrastructure, networks, operating systems, cloud technologies, or common security tools
- Additional knowledge in areas such as security incident response, SIEM, Identity & Access Management (IAM), vulnerability scanning, and auditing is an advantage
- Experience in IT security (e.g., patch management, access control)
- Structured, independent, and solution-oriented working style
- Team player with strong communication skills in German and English

We are looking for you if you:

- Enjoy taking responsibility for a stable and secure IT environment
- Are passionate about operating and continuously improving IT infrastructure
- Work in a structured manner and keep an overview even in complex situations
- Have a strong sense for IT security and risks
- Enjoy collaborating with external partners and driving initiatives forward
- Have experience with Microsoft environments and ideally Citrix
- Think in a service-oriented way and support users with technical challenges
- Feel comfortable in an international environment and enjoy teamwork
- Act proactively and focus on solutions rather than problems

It is an advantage if you:

- Have experience in international or multi-site IT environments
- Possess network knowledge (LAN/WAN, VPN, firewalls)
- Are familiar with backup, business continuity, and disaster recovery concepts
- Have worked with ITIL processes
- Have additional language skills (e.g., Hungarian)

We offer you:

- An interesting and responsible role
- A leadership culture and team that value collegiality and individuality
- Excellent working atmosphere
- Flexible working hours and the possibility of remote work
- Opportunities for training and professional development
- The minimum collective agreement salary (BG F02) is €3,818.84 gross per month. Depending on education, qualifications, and experience, a significant overpayment is possible.

We look forward to receiving your written application (CV and motivation letter) via email at:
